

### PROGRESSION

If a child attends Ramas Daycare a portfolio will be made available for parents to see where practitioners will observe their child and develop them through the EYFS.

We feel that this will help the parent to see how their child is developing. Parents will then have the opportunity to discuss any queries with the practitioners.

Finally, this will also give practitioners the appropriate information to assess if a child needs further help in a particular area of their development, which then the practitioner would include in their planning.

**FEEDBACK** Practitioners will exchange information (verbally) with a parent on a daily basis and a daily care sheet will be sent home with them.
